Thanks Juan!! No worries. We were running crazy with air issues and actually had to focus on a couple of non- hurricanes items! Let us know if you need anything!

Cheryl,

The water and wastewater teams continue to make good progress going thru the plant assessment sheets.

We work thru the call sheets as quickly as they are given to us.

We get the call lists on a daily basis, and we get thru them deftly.

Our water team leader, Mark McCasland has been deployed to Houston.
He was replaced by Andy Waite.

Sorry for the delay in the email today. I got busy.....

Juan
